

Project Design Phase-II

Data Flow Diagram & User Stories

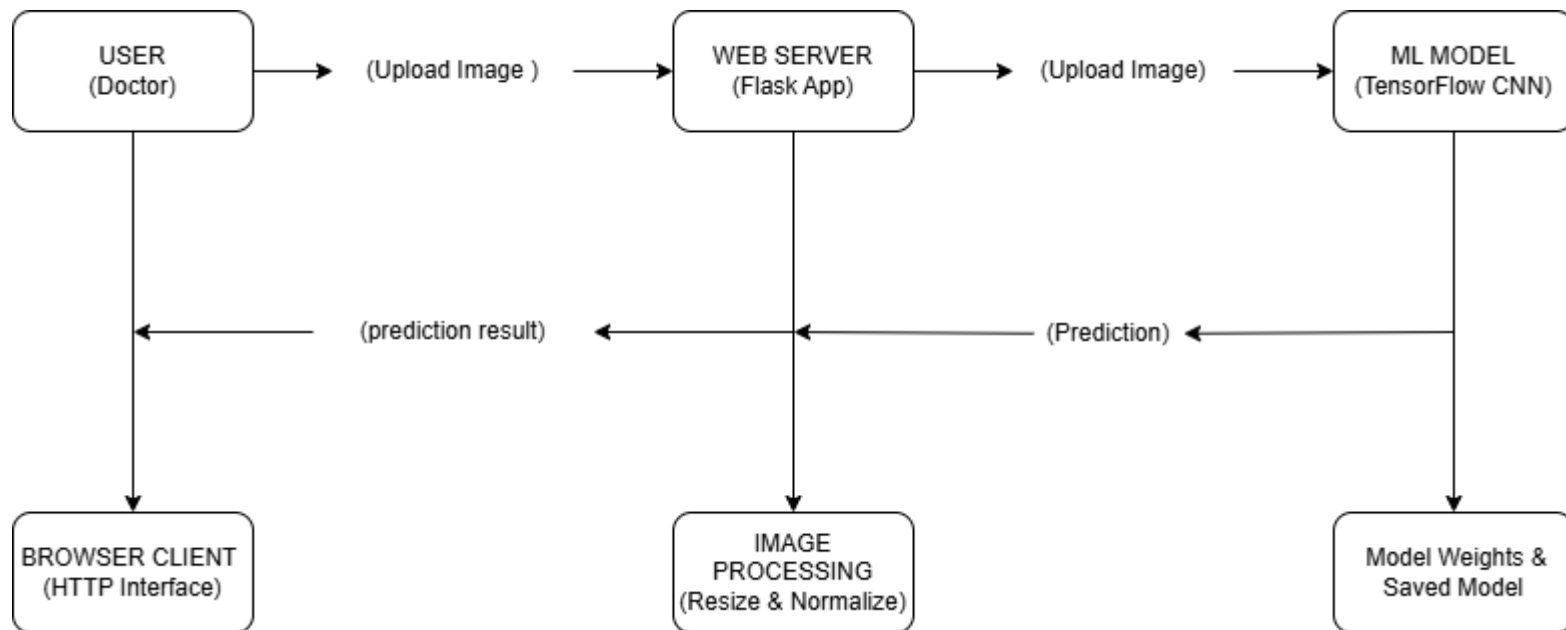

Date	7 March 2026
Team ID	PNT2022TMIDxxxxxx
Project Name	Malaria Detection using Deep Learning
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: DFD Level 0 (Industry Standard)

Example: [\(Simplified\)](#)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Mobile User)	Upload Image	USN-1	As a user, I can upload a microscopic blood cell image for malaria detection.	Image uploads successfully and is processed by the system.	High	Sprint-1
	Detection Result	USN-2	As a user, I can view whether the blood sample is infected or not.	System displays Parasitized / Uninfected result.	High	Sprint-1
	Image History	USN-3	As a user, I can view previously uploaded images and results.	System stores and shows previous results.	Medium	Sprint-2
	Report Download	USN-4	As a user, I can download the malaria detection report.	User can download report in PDF format.	Medium	Sprint-2
	Login	USN-5	As a user, I can log into the system using email and password.	User can access dashboard after login.	High	Sprint-1
Customer (Web User)	Upload Image	USN-6	As a web user, I can upload a blood smear image from my computer.	Image is uploaded and analyzed by the model.	High	Sprint-1
	View Result	USN-7	As a web user, I can see malaria detection results online.	Result page displays infection status.	High	Sprint-1
Customer Care Executive	Support User	USN-8	As a support executive, I can help users understand their results.	Executive can access user results for assistance.	Medium	Sprint-2
Administrator	Manage Dataset	USN-9	As an admin, I can update the malaria dataset used for training.	Admin can upload or modify dataset.	Medium	Sprint-2
	Monitor System	USN-10	As an admin, I can monitor system performance and detection results.	Dashboard shows system statistics and logs.	Low	Sprint-3
